

Yamaha YT6800.

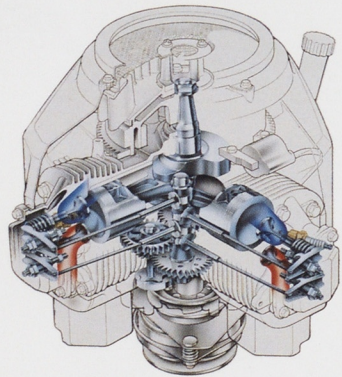

Not just bigger. Better. The YT6800.

Introducing the YT6800 lawn tractor. With unmatched technology, uncompromising standards and unequalled quality, Yamaha takes the features that make the YT3600 the finest mower money can buy—and gives you more of everything.

Superior OHV powerplant.

Engineered from tough aluminum alloy with cast-iron cylinder

Yamaha 18hp, V-Twin, OHV engine.

liners, this 18hp, 90-degree V-Twin, air-cooled, OHV design engine is compact and efficient. Advanced features like stellite exhaust valve seats and a pressure lubrication system with filter keep it reliable and durable.

An electronic ignition system provides easy starting in all climates. A two-stage air cleaner and oversize muffler keep noise to the minimum.

Sophisticated drivetrain.

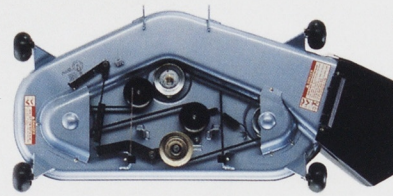

Mounted in a heavy-duty, reinforced steel frame, the engine is coupled to a hydrostatic (HST) transmission for silken smooth operation. No clutch or gear shifting is necessary. And with a differential and special Yamaha-designed tires, this tractor is extremely easy on tender turf.

Higher-quality cut.

The easy on/off deck offers a Memo-Dial™ height control system with memory for easy, precise cutting-height adjustments. With triple overlapping blades, the

Triple-bladed, fully-baffled deck.

48" deck w/ anti-scalp rollers.

special computer-designed, fully-baffled deck ensures a high discharge rate for an ultra-clean cut across its entire 48-inch width—even when the grass is thick and tough. Adjustable anti-scalp rollers help prevent turf damage on uneven terrain. And an electric PTO/Clutch Brake ensures quick, sure stopping of the mower blades.

Easier operation.

The spacious step-thru operator platform can be entered and exited from either side, while an adjustable high-back bucket seat offers maximum comfort. Color-coded controls and indicator lights provide easy operation and monitoring of vital systems. A tight turning radius, excellent visibility and hydrostatic drive make maneuvering

quick and easy, even around trees. And, of course, the YT6800 wears the Seal of Safety of the Outdoor Power Equipment Institute.

Designed for tomorrow.

A two-stage snow blower, front dozer blade, tire chains and other accessories are available for increased versatility. And for your increased productivity and satisfaction, the

YT6800 is built, like all Yamaha products, to be the very best there is. Now, and over the long run.

YAMAHA
POWER EQUIPMENT
Engineered for life.

Specifications

Engine		Chassis	
Type/Configuration	Overhead valve (OHV) 90° V-Twin	Type	Reinforced steel
Horsepower	18.0 Hp @ 3600 rpm	Steering	Sector & pinion
Displacement	35.0 cu. in. (573cc)	Turning radius	18.5 in. (470 mm)
Bore x Stroke	3.1 x 2.4 in. (78 x 60 mm)	Brake	Enclosed drum, 2.0 in. (50 mm)
Cooling System	Fan-Air	Tires	
Air cleaner	Replaceable, dual-stage, oversize	Front	15 x 6.00-6
Oil cleaner	Replaceable, spin on cartridge	Rear	20 x 10.00-8
Ignition	Transistor-controlled electronic, dual coils	Fuel capacity	2.5 gal. (9.0 lt.)
Electrical system	12 volt, automotive type	Cutting deck	
Starter	Key electric	Deck width	48 in. (1220 mm)
Muffler system	Oversize	Blades	Three
Drive		Height adjustment	1.0-4.0 in. (25-102 mm)
System type	Horizontal V-belt	PTO/Clutch/Brake	Electric/Mechanical
Transmission	Hydrostatic, infinite speeds	Warning signals	
Travel Speed		Oil, fuel, electrical	On dash panel
Forward	0-5.6 mph	Seat switch	Interlock system
Reverse	0-2.5 mph	Parking system	Single knob
		Dimensions	
		Dry weight	541 lb. (245 kg)
		Length	70.5 in. (1791 mm)
		Width	60.2 in. (1529 mm)
		Height	41.5 in. (1054 mm)
