Product Lineup

ARTICULATED ROBOTS

Ideal for compact cell construction, transport and assembly of small parts, and inspection work.

6-axis robots

- S-axis:** Rotate the body horizontally
- L-axis:** Move the body forward/backward
- U-axis:** Move the arm up/down
- R-axis:** Rotate the arm
- B-axis:** Move the tip of the arm up/down
- T-axis:** Rotate the tip of the arm

7-axis robots

- S-axis:** Rotate the body horizontally
- L-axis:** Move the body forward/backward
- E-axis:** Twist the arm
- U-axis:** Move the arm up/down
- R-axis:** Rotate the arm
- B-axis:** Move the tip of the arm up/down
- T-axis:** Rotate the tip of the arm

Reduce personnel, increase productivity

6-axis

7-axis

Type	Model	Application	Number of axes	Payload (kg)	Vertical reach (mm)	Horizontal reach (mm)	Page
6-axis	YA-RJ	Handling (general)	6-axis	1 kg (max. 2 kg ^{Note})	909	545	P.111
	YA-R3F			3	804	532	P.112
	YA-R5F			5	1193	706	P.113
	YA-R5LF			5	1560	895	P.114
	YA-R6F			6	2486	1422	P.115
7-axis	YA-U5F	Assembly / Placement	7-axis	5	1007	559	P.116
	YA-U10F			10	1203	720	P.117
	YA-U20F			20	1498	910	P.118

Note. When a load is more than 1 kg, the motion range will be smaller. Use the robot within the recommended motion range.

POINT

High-speed operation reduces cycle time

Thanks to high-speed, low-inertia AC servo motors, an arm designed for light weight, and the latest control technology, these robots achieve an operating speed that is best in their class. From supply, assembly, inspection, and packing to palletization, all applications can enjoy shorter cycle time and improved productivity.

Workpieces with a high wrist load are also supported

With a wrist section that has the highest allowable moment of inertia in its class, these robots can support jobs involving a high wrist load, or simultaneous handling of multiple workpieces.

Robot simulator dramatically reduces startup time

We provide software that lets you use 3D CAD data to construct a production facility in virtual space in a personal computer, and easily perform engineering tasks such as creating programs and checking for robot interference. Teaching can be performed even before the actual production line is completed, dramatically reducing line startup time.

Note. Optional support

Free arm movement further boosts productivity.

7-axis Reduced space allows sophisticated system layouts

Since these robots can be installed close to workpieces or other equipment, you can reduce the space required for your production facility. By locating multiple robots close to each other, processing can be integrated and shortened.

7-axis Access the workpiece from the opposite side or from below

Rotation of the seventh axis enables flexible movement with the same freedom of motion as a human arm, allowing the workpiece to be accessed from the opposite side or from below. This allows the robot to enter narrow locations that a person could not fit in, or to approach the workpiece in a way that avoids obstructions, giving you more freedom to design the layout for shorter cycle time and reduced space.

7-axis "Elbow movement" unique to 7-axis models allows optimal posture to be maintained

The 7-axis U-type robots allow "elbow movement," changing only the elbow angle without affecting the position or posture of the tool. This permits operation to avoid nearby obstructions.

YA-R3F

6-axis

- Maximum payload 3 kg
- Longest Reach R532 mm

Ordering method

YA-R3F	4L	YAC100				
Model	Power cable length 4L: 4m	Controller	Safety standard N: Normal E: CE marking	Language setting JE: Japanese/English JC: Japanese/Chinese EJ: English/Japanese EC: English/Chinese	Option I/O N, P: Standard I/O 28/28 N1, P1: 56/56 points N2, P2: 84/84 points N3, P3: 112/112 points N4, P4: 140/140 points	Network option No entry: None CC: CC-Link DM: DeviceNet master DS: DeviceNet slave PB: PROFIBUS EP: EtherNet/IP™ PM: Profinet master PT: Profinet slave ES: EtherCAT slave

Note. The YA-R3F, a compact manipulator with a motor of 80 W or less mounted on all axes, requires minimal space (baseplate: 240 mm × 170 mm). No fence is required for robot's working area. The robot can be used in applications such as automated guided vehicles (AGVs), testing equipment, and educational tools.

Note. Standard models include four air hoses (diameter: 4 mm), and an internal user I/O wiring harness (0.2 mm² × 10) running through the U-arm. This structure simplifies wiring and tubing for easier system construction.

Note. Floor-mounted, wall-mounted, and ceiling-mounted types are available. Please contact us separately regarding wall-mounted or ceiling-mounted installations.

Note. This unit can also be used in combination with a travel axis or other external axis. Please contact us.

Note. High degree of motion like a human arm with its 7-axis arm.

Note. The arm has been slimmed by employing a newly developed miniaturized actuator for the wrist section, greatly reducing the interference of the arm with the workpiece. Note. The narrowing of the motion range that usually results when downsizing a robot is avoided by an ingenious mechanism used for the arm joints, so maximum range is maintained.

Note. Light and weighs only 30 kg, so many installation choices are available: floor, ceiling, or wall. Please contact us separately regarding wall-mounted or ceiling-mounted installations. Note. By utilizing internal user I/O wiring harness and air lines integrated in the arm, layout can be planned offline without worrying about peripheral interference. (Internal user I/O wiring harness and air lines specifications: two air lines and eight-core cables) External axis specification for a hand can be accommodated. Contact YAMAHA regarding your requirements.

Specifications

Controlled Axis	7	
Payload	5 kg	
Repeatability	±0.06 mm	
Range of Motion	S-axis (turning)	-180° to +180°
	L-axis (lower Arm)	-110° to +110°

YAC100 Specifications

■ YAC100 controller specifications

Configuration	Standard: IP20 (open structure)
Dimensions	470 mm (W) × 420 mm (D) × 200 mm (H) (Protrusions are not included.)
Mass	20 kg
Cooling System	Direct cooling
Ambient Temperature	During operation: 0°C to +40°C During storage : -10°C to +60°C
Relative Humidity	90% max. (non-condensing)
Power Supply ^{Note}	Single-phase 200/230 VAC (+10% to -15%), 50/60 Hz Three-phase 200/220 VAC (+10% to -15%), 50/60 Hz
Grounding	Grounding resistance: 100 Ω or less
Digital I/Os	Specialized signals: 8 inputs and 11 output General signals : 16 inputs and 16 outputs Max. I/O (optional) : 1,024 inputs and 1,024 outputs
Positioning System	By serial encoder
Programming Capacity	JOB: 10,000 steps, 1,000 instructions C/O ladder: 1,500 steps
Expansion Slots	MP2000 bus × 5 slots
LAN (Connection to Host)	1 (10BASE-T/100BASE-TX)
Interface	RS-232C: 1ch
Control Method	Software servo control
Drive Units	Six axes for robots. Two more axes can be added as external axes. (Can be installed in the controller.)
Painting Color	Munsell notation 5Y7/1 (reference value)

Note. YA-R6F: Three-phase only.

■ Optimum controller for handling and assembly

The YAC100 is a compact controller with improved performance and functions optimized for handling and assembly.

- Fits in a 19-inch rack and can be installed under conveyors.
- Commands specifically designed for workpiece handling with synchronized conveyors.

Hardware Options

- External axis (max.: 2 axes)
- I/O module (28 points, NPN or PNP)
- Major fieldbus interface boards DeviceNet™ (master/slave), CC-Link (slave), PROFIBUS (slave), EtherNet/IP™ (slave, I/O communications), EtherCAT (slave)

Optional Functions

- Conveyor synchronization
- Vision function
- External reference point control
- Software pendant

■ Regarding the concurrent I/O ladder program

The YAC100 controller is equipped with an NPN (or PNP) for standard I/O. Dedicated input/output is assigned to this standard I/O board. For this reason, if dedicated input/output is to be assigned to various types of field bus, concurrent I/O ladder program settings must be made.

Sample programs can be downloaded from our website.^{Note}

<http://global.yamaha-motor.com/business/robot/>

Note. The member site requires registration.

A robot simulator that implements the same functionality as the actual controller

MotoSim EG-VRG for YAMAHA

Virtual programming before the actual line is completed allows major reduction in line startup time.

■ Modeling layout

Models of workers and workpieces can be easily laid out.

■ Intuitive control of models

Models can be moved intuitively, simply by using the mouse.

■ Programming and debugging

Automatic generation of robot operating programs, job editing, and job analysis can be performed easily.

■ Intuitive robot operation

The robot's posture can be operated intuitively, allowing more efficient teaching.

■ Robot simulation

The robot can be watched as it operates, allowing visual verification.

■ YAP programming pendant specifications

Dimensions	169 mm (W) × 314.5 mm (H) × 50 mm (D)
Mass	0.990 kg
Material	Reinforced plastics
Operation Device	Select keys, axis keys (8 axes), numerical/application keys, Mode switch with key (mode: teach, play, and remote), emergency stop button, enable switch, compact flash card interface device (compact flash is optional.), USB port (1 port)
Display	640 × 480 pixels color LCD, touch panel (Alphanumeric characters, Chinese characters, Japanese letters, Others)
IEC Protection Class	IP65
Cable Length	Standard: 8 m, 4 m / 8 m / 12 m extension cable (maximum 20 m)
