Note 1. Driver selection and regenerative unit selection depends on the robot type.

See Specification selection table on following page.

Note 2. The regenerative unit (option) is required when operating a model designated by YAMAHA or a load with a large inertia.

Note 3. NPN and Ethernet are not selectable if using CE marking.

Note 4. Available only for the master.

Note 5. Only when you have selected CC, DN or PB for Input/Output selection 1, you can select EN for Input/Output selection 2.
