Support software for PC

VIP+ is easy to operate application software that makes tasks such as robot operation, writing-editing programs, and point teaching easy to visually understand.

Features

New support software VIP with improved ease of use

1. GUI updated for enhanced usability

The user interface has been improved with the VIP Windows function kept as it is so as to achieve more ease of use.

2. Data displayed in the tree view form

The data included in the controller is displayed legibly.

3. Fully equipped tool bar

Each of various functions can be executed by simple one click on the tool bar.

4. Expanded monitor function

The I/O conditions and variables in the controller can be monitored at real time. In the advanced mode, it is also possible to attach any label (Note) to general purpose input/output and others.

Note. The label is stored in PC.

5. Data operation using the new drag & drop function

The data can be stored easily by using the drag & drop function. Likewise, the stored data can be restored to the controller by operating the mouse only.

Select the data to be stored. Drag the selected data to the document window and drop it there. Specify the file name and this completes the storage procedure.

6. Input the data in the work sheet form (Parameter, Point data)

It is also possible to copy and paste the data from the other spread sheet (chart calculation software).

7. Syntax coloring when editing the program

When reserved words (character string reserved as the robot language) are inputted, they are colored automatically, making them noted at one glance for easier program editing.

8. Program execution monitor

The step being performed during the program execution can be monitored. Thus, it is possible to check which step is performed without stopping the program, thereby debugging of the program is made much easier.

9. List appointing (point where the system is restored)

It is possible to create the system restoration point at any timing. By doing so at important points in the system constructing process when, for example, something faulty is found after the system was changed, the system can be returned to the state before such change easily.
VIP PLUS function

1. Easy to use
With a number of robot operation items provided on one screen, any operator can operate easily without memorizing the menu construction.

2. Programming editing
The program, point, parameter, shift, and hand can be edited on the PC alone. Equipped with the function selector having the command searching function which enables to input the robot language with ease.

3. Data check function
Provided with the equivalent data check function to that of a robot controller, it is possible to correct data errors before operation.

4. Help function
When more information is needed during operation, press the [F1] or [HELP] key, and the help screen will appear.

5. Robot operation
By connecting PC and controller with communication cable, robot operation will be available by the on-line command.

6. On-line editing
Connecting a PC and the controller with a communication cable enable to edit data from robot controllers just as with RPB / RPB-E.

7. Creating point data
There are three methods available for creating the point data.

- MDI (Manual Data Input) teaching
  The numeric keyboard is used to enter position coordinate data directly.

- Remote teaching
  The robot arm is actually moved to the target position using the keys for point data registration.

- Direct teaching
  The robot arm is manually moved to the target position with the servo motors off for point data registration.

### Support software for PC VIP+

| Model   | KX0-M4966-00 |

### Environment

<table>
<thead>
<tr>
<th>OS</th>
<th>Microsoft Windows 2000 / XP / Vista (32bit / 64Bit) / 7 (32bit / 64Bit)</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPU</td>
<td>Processor that meets or exceeds the suggested requirements for the OS being used.</td>
</tr>
<tr>
<td>Memory</td>
<td>Suggested amount of memory or more for the OS being used.</td>
</tr>
<tr>
<td>Hard disk</td>
<td>40MB of available space required on installation drive.</td>
</tr>
<tr>
<td>Communication method</td>
<td>RS-232C, Ethernet</td>
</tr>
</tbody>
</table>

Note: For Ethernet communication, Ethernet unit for RCX series controller is required.

### Applicable robot controllers

- RCX221
- RCX222
- RCX141
- RCX142
- RCX240

### Data cables (5m)

Communication cable for VIP+. Select from USB cable or D-sub cable.

#### Model

<table>
<thead>
<tr>
<th>USB type (5m)</th>
<th>D-Sub type 9pin-9pin (5m)</th>
</tr>
</thead>
<tbody>
<tr>
<td>KBG-M538F-00</td>
<td>KAS-M538F-10</td>
</tr>
</tbody>
</table>

Note: Data cable jointly used for POPCOM, VIP, VIP+.

### Controller and data cable connection diagrams
