Addition of the Code Authentication Version for 'RCX-Studio 2020'

Dear Valued Customer,

We hope that this letter finds you well.

Regarding our support software "RCX-Studio 2020" for the RCX3 Series controllers, we are pleased to inform you that, in addition to the conventional USB-key method, a new code-authentication version is now available.

We hope that you will continue to use our products.

[Additional Information]

Provision Method: Added a code-authentication version in addition to the USB-key version.

Applicable Products: RCX-Studio 2020 Basic / Pro

Merits: No USB key required. Enables easy code-based authentication, avoids customer-side security restrictions, and reduces risks of loss or failure.

[Start of Availability]

From January 2026

[Further Information]

Please refer to our website for details on the specifications and models of the code-authentication version.
