

Rare Animals of the World**Vol.5****Tiger****Assembly Instructions**

Thank you for downloading this paper craft model of the Tiger. By matching the names and numbered parts in the instructions, you and your family can complete a paper craft model of this rare and precious animal.

- Assembly instructions: Six A4-sized sheets.
- Paper craft: Three A4-sized sheets with 8 parts in all

These instructions apply only to the "Tiger".

These Paper Craft parts are easier to work with when printed out on strong, thick paper (like postcard stock).

*In creating these Paper Craft models we use 135kg Kent paper stock (0.18mm).

1 To begin

■ Tools and materials needed

-Ruler - scissors - blade cutter or "Exacto-knife" - awl or other pointed tool (for making a folding crease) - felt pen - pin set - glue - hand towel (for cleaning your fingers) - dictionary or other heavy book (to press the papers flat).

■ Items of Caution

*Take care when using sharp or pointed objects or when using bladed cutting tools. Place a heavy sheet of paper under the paper you want to cut.

*Use glue and other adhesives only in well-ventilated areas.

*When printing, use a slightly reduced font size. There may be differences in dimensions, depending on the type of printer used.

2 How to assemble

*Follow the working method and markings carefully.

*Cut carefully along the outer line with cutting blade, Exacto-knife or scissors.

One - point Advice

*Cut carefully with cutting blade, Exacto-knife or scissors.

*For folding parts, first use an awl or other pointed tool to make a light crease along the dotted or solid line. This will make the folds straight. Avoid making strong creases, as this will cause the paper to tear.

*As an adhesive, white wood glue is recommended. Avoid over application as this may cause the paper to wrinkle.

*Before beginning assembly, test adhesive amounts on extra paper.

*Occasionally, white spots will be apparent on folds and cuts. Use a marker or pencil to fill in these spots. It is recommended that this be done after each stage of assembly because coloring becomes more difficult once parts are assembled.

Basic working method and markings

————— Solid lines

Fold along these lines. The printed surface should be on the outside of the folded shape.

----- Broken lines

Fold along these lines. The printed surface should be on the inside of the folded shape.

..... Dotted line

Cut along these lines.

Do not fold or cut the parts marked X.

Cut out parts marked with an asterisk(*).

Red dots are the reference positions for gluing surfaces.

3 Assembly

Please refer to the "Basic working method and markings" symbol chart on Page 2 to assemble each part.

Indication of Working Methods

Fold or Curve

Glue

Instructions for Tiger

1. Head Fold each relevant part according to the assembly symbols.

Reference photo

2. Lower Jaw

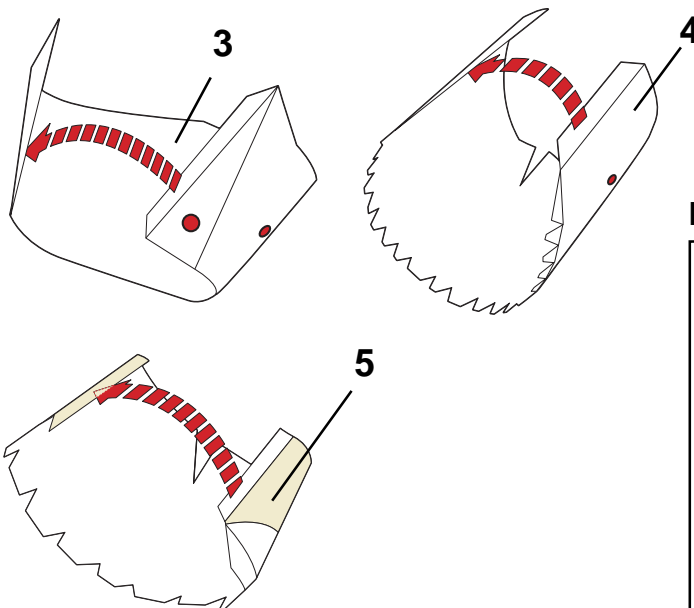

Fold each relevant part according to the assembly symbols.

Reference photo

3. Trunk Fold each relevant part according to the assembly symbols.

Roll and glue each part into a cylindrical shape and glue the parts together in the order shown in the reference photo.

Reference photo

Please refer to the "Basic working method and markings" symbol chart on Page 2 to assemble each part.

Indication of Working Methods

Fold or Curve

Glue

Instructions for Tiger

- 4. Forelegs** Fold each relevant part according to the assembly symbols.

Reference photo

- 5. Hind legs** Fold each relevant part according to the assembly symbols.

Reference photo

Please refer to the "Basic working method and markings" symbol chart on Page 2 to assemble each part.

Indication of Working Methods

Fold or Curve

Glue

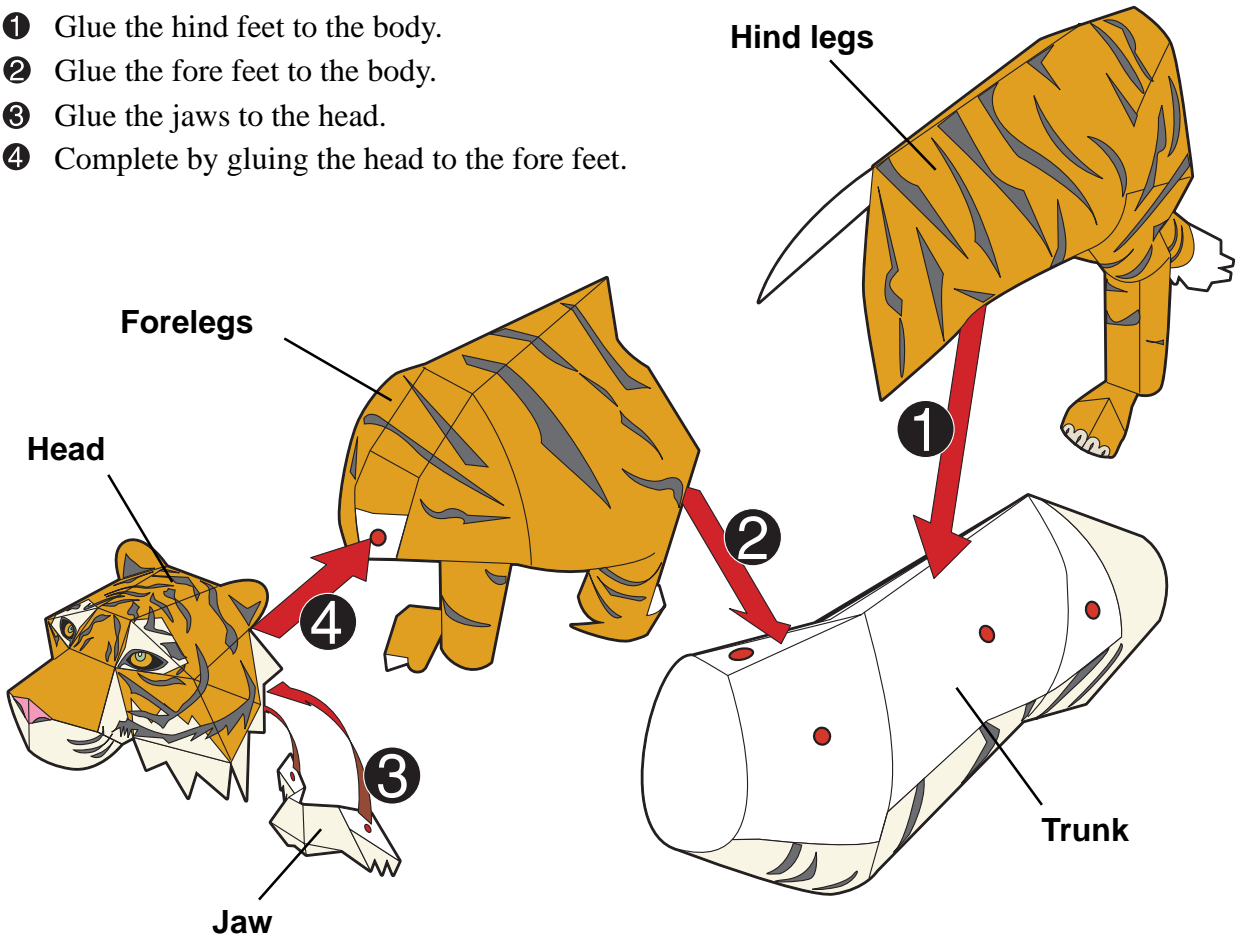

Instructions for Tiger

Please use the ● dots on each component as reference when gluing surfaces.

6. Finish Assemble according to steps ① through ④ .

Procedure

- ① Glue the hind feet to the body.
- ② Glue the fore feet to the body.
- ③ Glue the jaws to the head.
- ④ Complete by gluing the head to the fore feet.

Reference photo

Pedestal

* Display the completed paper sculpture on the pedestal.

4 Completion

Here are pictures of the completed models.
Please refer to them when assembling and painting.

Colored Tiger

Uncolored Tiger

Uncolored sculpture with textured paper.

Rare Animals of the World - Tiger

The tiger is the largest existing carnivore of the cat family, some of the species reaching a weight of 250kg (approximately 551 lbs.) or more. Unlike the lion, the tiger is a solitary animal, forming no groups. Its remarkable stripe pattern plays the role of camouflage, allowing the species to blend in with its surrounding environments such as forests. The tiger inhabits various regions, and unlike other species belonging to the cat family, it actually likes water. Tigers inhabiting tropical zones especially spend hours in the water. Currently, five subspecies of the tiger, including the Bengal tiger (5,000 to 7,200 individuals in total), are widely scattered throughout Asia. All of the subspecies have been decreasing in number and suffer the danger of extinction due to poaching for their fur coat, whiskers, and bones.
